- Rugged vehicle cradle
- 9-36 V DC input
- Integrated regulator box
- RS232 interface

The CRD665-REG is a rugged standard vehicle cradle for the Topicon MDT665. It is designed for fixed in-vehicle installation and provides a secure docking solution for daily professional use.

The cradle includes a regulator box and supports a wide 9 to 36 V DC input range. It also provides an RS232 interface for connection to vehicle or peripheral systems.

Ideal for professional vehicle applications that require a reliable docking solution.

Compatible with: Topicon MDT665
