- Barcode scanner module
- 1D and 2D barcode capture
- For Topicon MDT665
- Modular data capture

The MOD-665-BAR is an optional barcode scanner module for the Topicon MDT665. It adds fast and convenient data capture to the handheld and is ideal for logistics, warehousing, field service and inventory workflows.

Designed specifically for the MDT665, the module supports mobile use in professional environments. Its modular concept allows the device to be configured according to the application.

A practical solution whenever 1D and 2D barcodes need to be captured directly on the handheld.

Compatible with: Topicon MDT665
