- 9-36 V vehicle power
- Ignition signal
- RS232 interface
- Bottom cradle connector

The cable set CAB-1065-BASIC + CAB-BMW-BASIC + CAB-EX-BASIC connects the cradles of the MDT1065 to the vehicle. It plugs into the cradle from the bottom.

It carries vehicle power (9 to 36 V), the ignition signal, ground and one RS232 interface. This makes it suitable for simple vehicle installations with a serial connection, e.g. with the CRD1065, CRD1065-M12 or CRD1065-BAS.

Compatible with: Topicon MDT1065
